ALICE-X measurement-column sensitivity
CP formula: Methods S1 section 3; CSV column mapping remains an inference
Upstream script: huTfR1_fc_log2_enrichment
Pearson r = 0.423468
n = 500
Mean of fitness and selected measurement
Mean of two archived predictions
Alternative: huTfR1fc_log2_enrichment
Pearson r = 0.522841
n = 500
Mean of fitness and selected measurement
Mean of two archived predictions
